

SD Series

Diffusers

Features

SD series diffusers consist of an assembly of two concentric steel tubes with inter spaced holes to produce a progressive reduction in oil velocity thus minimising noise, turbulence and foaming of return fluid to a reservoir.

Type	Dimensions mm			
	A - BSPP	B	C	CH
SD64A-34G	3/4"	109	64	35
SD64B-100G	1"	139	64	46
SD86A-114G	1-1/4"	139	86	52
SD86B-112G	1-1/2"	200	86	60
SD86C-200G	2"	260	86	70
SD150A-212G	2-1/2"	211	150	90
SD150B-300G	3"	272	150	100
